SUMMARY

Software engineering leader with 19+ years building and scaling teams, from hands-on technical lead to Director of a 37-person organization. Proven record of modernizing platforms, cutting costs (40% YoY), and speeding up delivery (50%), now leading AI-assisted, spec-driven development at Tenna, a John Deere Company.

EXPERIENCE

Team Lead

Tenna, a John Deere Company (Construction B2B SaaS | 200 Employees) **October 2025 – Present, Jersey City, NJ (remote)**

- **Role:** Lead software development team of 6 engineers focused on building new product features for the Tenna platform.
- **Projects:** Owner of the integrations domain. Built APIs that let customers tightly couple their internal systems with Tenna, and integrated Tenna with Virtual Superintendent.
- **AI-Assisted SDLC:** Used Claude Enterprise heavily throughout the spec-driven SDLC, from planning and design through development, code review, and testing.
- **Tech Stack:** AWS, GitHub, K8s, Helm, Docker, FluxCD (GitOps), SingleSpa (Micro-UI), Hapi, React, Redux, RabbitMQ, Redis, Elasticsearch, Postgres, Grafana, Confluence.
- **Acquisition:** Stayed on through John Deere's acquisition, helping scale the organization and processes as the company transitioned from startup to enterprise.

Technical Lead (Back End)

Deloitte Consulting (Contract via Dexian) **March 2025 – October 2025, Jersey City, NJ (remote)**

- **Role:** Short-term contract focused on API development, data integration, and cloud architecture.
- **Tech Stack:** Azure, containerized Node/Express API (Azure App Services), .NET microservices (Azure Functions), Angular front end, SAP/CC&B back end, Tibco and Boomi data integrations, Redis, Cosmos DB, SQL Server (Azure), Azure DevOps, Confluence.
- **Project:** Mission-critical, customer-facing product with thousands of daily users at a major energy company headquartered in Chicago.

Director of Software Development

Raymour & Flanigan (Retail Industry | 5k Employees) **March 2023 – May 2024, Jersey City, NJ (remote)**

- **Role:** Led software development organization; owned architectural strategy and designed modern UI, API, and data integration architecture.
- **Org. Size:** 3 managers (AppDev, Oracle, Data Integrations/API), 4 architects, 30 developers (internal, near-shore, offshore); direct reports: managers and architects.
- **Cost Savings:** Negotiated development partner (near-shore/on-shore) and vendor contracts and managed the organizational budget, achieving a 40% YoY cost reduction.
- **Tech Stack:** React, .NET (C#, UWP, ASP.NET Core), SQL Server, Oracle DB, Azure, AWS, Windows Server, Git (Azure DevOps), Boomi, Snowflake.
- **Initiatives:** ERP migration to NetSuite, WMS migration to Körber, omnichannel sales experience via e-commerce site, and third-party API integrations (ChargeAfter, Bringg).
- Defined and implemented organizational strategy (1- and 5-year), goals (OKRs), processes (Agile, DevOps), 24/7 support strategy, and coding/review standards.
- Aligned cross-functional teams within a matrixed IT organization, coordinating with infrastructure, product management, BI, design, and e-commerce.

Director of Operations Technology

MEARS Group, a Quanta Services Company (Energy Industry | 2.5k Employees) **October 2017 – March 2023, Jersey City, NJ (remote)**

- **Role:** People manager and hands-on technical lead for the Operations Technology software development team, covering requirements, architecture, design, full-stack development, QA, DevOps, and production support. Also administered on-prem Windows servers, Azure DevOps, and the Azure subscription.
- **Team Size:** 4 developers, 1 PM, and 7 offshore developers (100% remote; direct reports: FTE developers and PM).
- **Tech Stack:** .NET (C#, ASP.NET Core, Blazor), SQL Server, SQLite, Azure, Windows Server, JavaScript (Angular, Node, Electron), Git, Power BI, Power Automate, Java (Spring Boot).
- **Project:** Mission-critical, SOX-compliant revenue/time/equipment field capture solution used by 700+ construction crews across the U.S.; sped up the closing process by 75%.
- **Titles:** Manager (2017–2020), Senior Manager (2020–2021), Director (2021–2023).
- Traveled to U.S. field locations to roll out applications and lead change management (25% travel).
- Implemented and trained the organization on DevOps, CI/CD, Agile Scrum, Kanban, GitFlow, and QA processes, increasing delivery speed by 50%.

Team Lead

Worldwide Machinery (Construction Industry | 60 Employees) **April 2016 – October 2017, Houston, TX**

- Led internal software development team (3 internal and 5 contract developers), reporting to the company's co-owner.
- Full-stack development of mission-critical asset management software (desktop, mobile, and web) managing $300M in heavy machinery assets.
- Built a mobile-first SPA giving employees real-time telemetry on machinery assets.

Technical Lead

HP Inc. (Consumer Electronics Industry | 50k Employees) **December 2011 – February 2016, Houston, TX**

- Designated technical lead over a mission-critical, third-level support tool with 10k+ global users.
- Full-stack development of 3-tier web applications using .NET, SQL Server, and JavaScript.
- Led logical split and cloning of the system during HP's split into HPE and HP Inc.
- **Titles:** Senior Developer (2011–2013), Technical Lead (2013–2016).

Software / Systems Engineer

X-Fab Texas, Inc. (Semiconductor Manufacturing | 400 Employees) **May 2007 – December 2011, Lubbock, TX**

- Built .NET/SQL Server applications and global machine monitoring and inventory systems; administered Windows/Linux servers.
- **Titles:** IT Intern with Texas Tech University (2007), Software / Systems Engineer (2007–2011).

EDUCATION

Bachelor of Science in Computer Engineering

Texas Tech University • Lubbock, TX **August 2005 – December 2009**
